Areas of capacity building

Broad areas in which capacity is needed

- Institutional capacity
- Human resources capacity development and training
- · Risk assessment and other scientific and technical expertise
- Risk management
- · Public awareness, participation and education in biosafety
- · Scientific, technical and institutional collaboration at subregional, regional and international levels
- · Technology transfer
- · Identification of LMOs, including their detection
- Socio-economic considerations
- Implementation of the documentation requirements under Article 18.2 of the Protocol
- Handling of confidential information
- Measures to address unintentional and/or illegal transboundary movements of LMOs $\,$
- · Scientific biosafety research relating to LMOs
- · Taking into account risks to human health

Needs and priorities

Specific needs and priorities

· Development of a national biosafety policy

Extent of implementation Preferred means

Major target groups

Minimally addressed	Technical assistance and adviceFunding supportEducation and training	 General public Government regulators / administrators Enforcement officials (e.g. field inspectors)
